

Power. Driven.

Taking more people to their game...and job...than any other battery.

People responsible for equipment performance know that Crown Deep Cycle Batteries out-perform all others. Literally. Because playing hard, or working hard, requires a heavy-duty battery that can take it. Delivering power at your command...and performing longer at a lower cost per cycle than most competitors. In today's competitive world

no one can support deep cycle battery users better, and in turn, deliver the continued quality, heavy-duty construction and service that is the trademark of Crown Battery.

The Power Behind Performance

Crown Heavy-Duty Deep Cycle Batteries. Heavy-Duty Construction. Heavy-Duty Performance.

• Heavy-Duty Construction

Crown deep cycle batteries are the heavyweight of the industry. More weight means more lead, which translates into batteries that work and last longer.

• Tough Connectors

Machine burned, heavy-duty TTP (through-the-partition), COS (cast-on strap) and terminal post connectors deliver maximum efficiency and durability.

• Polypropylene Case & Cover

Durable container design includes a removable handle feature for easy installation and safe handling

• Anchor-Molded Terminal

Crown golf batteries molded-in-cover terminal affords superior durability, problem-free installation and best-available corrosion protection to deliver maximum productivity and safe handling.

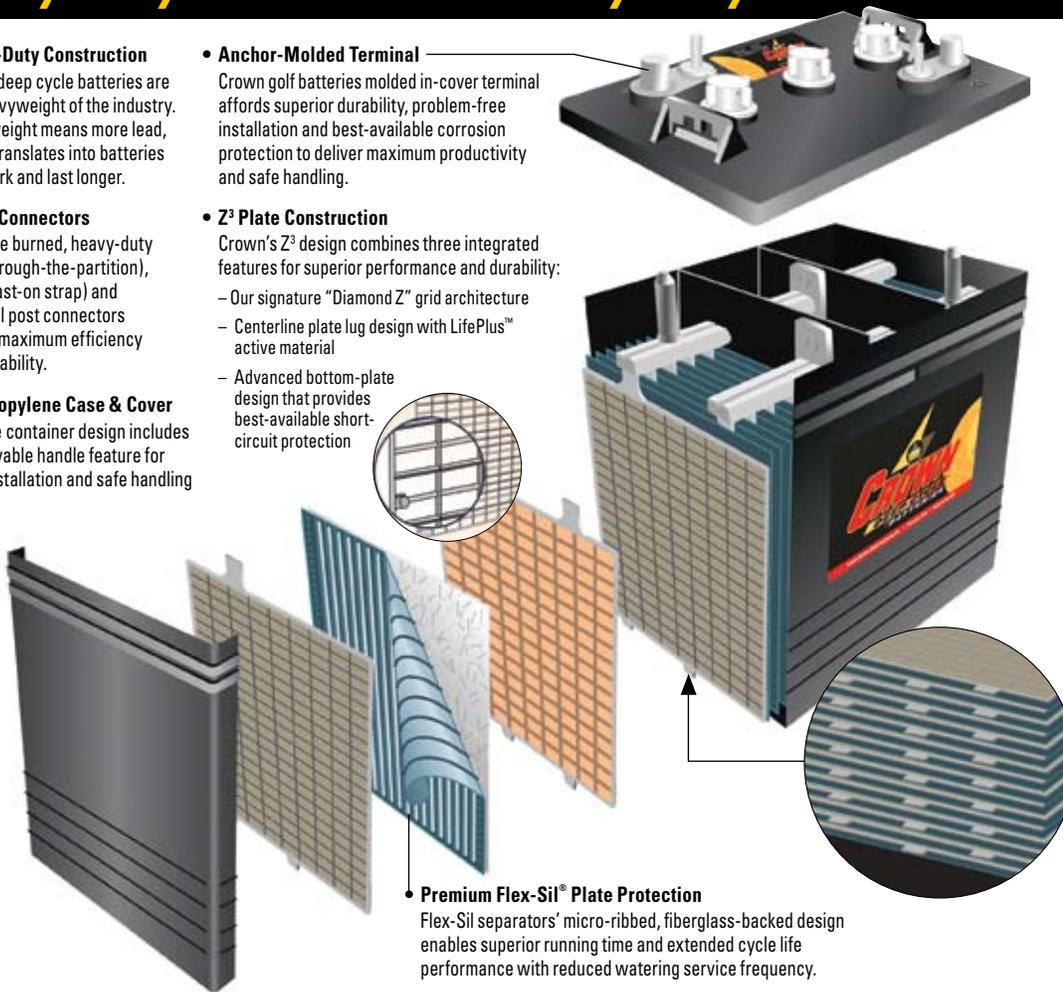

• Z³ Plate Construction

Crown's Z³ design combines three integrated features for superior performance and durability:

- Our signature "Diamond Z" grid architecture
- Centerline plate lug design with LifePlus™ active material
- Advanced bottom-plate design that provides best-available short-circuit protection

• Premium Flex-Sil® Plate Protection

Flex-Sil separators' micro-ribbed, fiberglass-backed design enables superior running time and extended cycle life performance with reduced watering service frequency.
